This manual will walk you through all the required steps to add your new Yale Assure Lock to your door.

- Remove Existing Door Hardware
- Double Check Door Measurements
- Install your Assure Lock
- Program your Assure Lock
- Add your Assure Lock to your smart home system or August App*

Tools Needed
- Standard Phillips Head Screwdriver

Tools necessary only for new doors or adjusting existing door
- Drill
- Pencil
- Wood Mortise Chisel
- Tape Measure
- Utility Knife
- Level

DOWNLOAD THE BILT APP
for step-by-step installation instructions & to register your product

*If purchased with Yale Smart Module or Connected by August Kit

FAILURE TO FOLLOW THESE INSTRUCTIONS COULD RESULT IN DAMAGE TO THE PRODUCT, VOIDING THE FACTORY WARRANTY AND COULD LEAD TO FAILURE OF THE PRODUCT TO PROVIDE ACCESS.
**What's In The Box**

**Keypad**

![Keys](image)

**Keys**

- Loosen screw to remove cover

**Inside Lock Assembly** (Separates into 3 components)

- Battery Cover
- 4 AA Batteries
- Inside Lock
- Mounting Plate

**Mounting Hardware**
The mounting hardware box includes 12 components

- Strike Plate
- Adjustable Deadbolt
- Inside Lock Screws x2
- Strike Plate and Deadbolt Screws x4
- Optional Security Strike Plate Screws x2
- Long through bolt for 1-3/4" - 2-1/4" Door Thickness x2

**Optional Yale Smart Module**

**Installation Guide Envelope** (Includes this manual and door checker with template)

![Installation Guide Envelope](image)

**Optional Fire Kit Parts**

- 4 AA Batteries
- Long through bolt for 1-3/4" - 2-1/4" Door Thickness

**Let's Get Started**

- Keypad
- 4 AA Batteries
- Keys
Removing Existing Door Hardware

Do not discard old lock hardware until Assure Lock has been successfully installed.

Frame
Check Door Measurements and Make Adjustments If Needed

Door Checker

*Use door checker from installation guide envelope to verify your door measurements and make any needed adjustments.*

New Door Marking Template

*With door checker, use template from installation guide envelope to prep a new door that has not been predrilled for hardware.*

Installing Optional Fire Cup

*optional*
Installing Latch & Strike Plate

*Deadbolt latch position is based on backset. Choose position appropriate for your door. Reference Door Checker measurements E and F.

Bolt must be in retracted (unlocked) position. Note horizontal orientation of tailpiece slot and UP orientation of deadbolt latch.

Choose standard strike plate screws or security screws.
4 Installing Keypad

Bolt must be in retracted (unlocked) position. Note horizontal orientation of mechanism.
5

Installing Inside Mounting Plate

x2

Actual Size

optional
Attaching the Cable Assembly

Use cable hooks to ensure proper routing.

Do not pinch wire.

Ensure cable is securely fastened into adapter.
7 Installing Inside Lock

Ensure thumbturn is vertical. If the thumbturn does not move freely, refer to the hardware troubleshooting steps.
Testing Mechanical Operation

If thumbturn operation fails, check the installation beginning with Step 5.

Bolt must be in retracted (unlocked) position before installing AA batteries.
Installing Optional Yale Smart Module

Batteries must not be installed prior to inserting and/or removing the Yale Smart module.

For more information about Yale Smart modules and smart home features visit: https://www.yalehome.com/en/yale/yalehome/residential/yale-smart-home-guide/
Congratulations, you’ve installed the Yale® Assure Lock® Keypad Deadbolt (YRD216)!

Bolt must be in retracted (unlocked) position before installing batteries.

Tighten screw to replace cover

Touch any key to wake the lock.

Additional entry codes and further programming can be done through the Settings Menu. Refer to page 15.
Using Your Lock

Keypad
- Low Battery Indicator (flashes red)
- Press any key to wake lock
- All Code Lockout Mode (keypad flashes)
- Press to enter or unlock
- Enter Master Entry Code and press to access Settings Menu
- Mechanical Key
- Backup Entry Method

Inside Lock
- Battery Cover
- Inside Notification Light
- Speaker
- Privacy Button
- Thumbturn for manual locking and unlocking
Creating Master Entry Code

The master entry code is used to change the lock settings. A security best practice is to set your master code with 6 or more digits and create a separate code that is used daily to lock and unlock the door.

1. Press any key to wake lock.
2. Enter 4-8 digit Master Entry Code.
3. Press to confirm.
Creating Entry Codes

Master Entry Code must be created first.

*Max user codes = 250 with Smart Module; 25 without.

Press any key to wake lock

Enter Master Entry Code
Press 0

Press 0

Press 0

Enter 4-8 digit entry code
(code flashes)

Adding more *User Codes:

Press 0
Enter 4-8 digit entry code
Press 0

To end programming:

## Troubleshooting

<table>
<thead>
<tr>
<th>Symptom</th>
<th>Suggested Action</th>
</tr>
</thead>
</table>
| Lock does not respond – door is open and accessible.                   | • Yale keypad becomes active when the Yale logo is pressed.  
  • Verify contact with the logo.  
  • Check to see if keyed numbers respond when pressed.  
  • Check batteries are installed and oriented correctly (polarity) in battery case.  
  • Check batteries are in good condition; replace batteries* if batteries are dead.  
  • Check to see if keypad cable is fully connected and is not pinched. |
| Lock does not respond – door is locked and inaccessible.              | • Batteries may not have enough power. Replace batteries*.  
  • Use key to gain entry and replace batteries*. |
| Lock is on for a while then shows no reaction. Lights dim.             | • Batteries do not have enough power. Replace batteries*. |
| Lock chimes to indicate code acceptance, but door will not open.       | • Check the door gaps for any foreign objects between door and frame.  
  • Check that the cable is firmly connected to the inside lock. |
| Lock operates to allow access, but will not automatically re-lock.      | • Check to see if Auto Re-lock is enabled.  
  • Disable Auto Re-lock to lock the door (manually).  
  • If low battery indicator is lit, change batteries*. |
| Entry codes will not register.                                        | • Entry codes must consist of 4 to 8 digits.  
  • The same entry code cannot be used for multiple users.  
  • Management of entry codes is set by the authority of the Master Code, which is set first. Contact the Master user.  
  • Entry codes must be entered within 5 seconds (while keypad is active) or process will have to be restarted.  
  • Check [✓] or gear [✓] cannot be used as part of the entry code. |
| Upon entering an entry code and pressing [✓] key, the lock beeps and flashes red and blue 7 times and does not unlock. | • Verify entered code is a valid, previously programmed, 4 to 8 digit code.  
  • All Code Lockout Mode is enabled. Only the Master Entry Code can enable/disable All Code Lockout Mode. Contact the Master user. |
| Upon entering an entry code and pressing the [✓] key, there are different tones. | • Check to see if the lock is set to All Code Lockout Mode. Setting/managing All Code Lockout Mode is done through Master Entry Code only.  
  • Contact Master user. |
| Lock operates, but makes no sound.                                    | • Enable Audio Mode (see Feature #4). |
| Lock displays intermittent RED flashes                                 | • This is the alert to replace the batteries. Replace all four (4) batteries* with new AA Alkaline batteries. |
| Upon entering an entry code and pressing the [✓] key, lock beeps and flashes 3 times. | • The digits entered were incorrect or incomplete. Re-enter the correct code followed by the check [✓] key. |
| Deadbolt does not extend when locking the door with keypad.           | • Lock was not handed properly. Rehand lock through settings menu. |

* When batteries are replaced, Smart Module locks have a real time clock that will be set through the User Interface (UI); it is recommended to verify correct date and time particularly those locks operating under Daylight Saving Time (DST).
Hardware Troubleshooting

If deadbolt does not extend or retract easily when testing thumbturn and keypad operation, revisit inside and keypad installation steps. It is important that the bolt be in the retracted position during lock installations and that installation procedure is followed carefully.

Helpful Tip:
Ensuring smooth deadbolt operation can enhance your battery life.

If you feel resistance, ensure deadbolt strike plate aligns with deadbolt. If deadbolt strike plate is out of alignment, please attempt to adjust knob/lever/handleset strike using steps below. The knob/lever/handleset latch engagement into the strike is the main component used for door alignment.

If deadbolt does not fully extend, consider increasing depth of deadbolt strike pocket in frame.

To adjust Knob/Lever/Handleset strike plate:

1. Remove plate from door frame with a manual screwdriver. (Using an electric driver may strip screw heads or enlarge screw holes.)

2. Locate strike plate tab. Bend the tab towards surface of strike. Note: a small change may be all that is required

3. Reinstall strike plate using a manual screw driver and test again.

4. If door cannot be adjusted sufficiently with strike tab, both knob/lever/handleset latch and deadbolt latch could require adjustment – we suggest you contact a local locksmith for assistance.

For help with misalignments, watch our door alignment video:
Resetting Lock to Factory Default

When lock is reset to factory defaults all user codes (including the Master Entry code*) are deleted and all programming features are reset to original default settings (see below).

1. Remove the battery cover and batteries.
2. Remove the interior side of the lock to access the reset button.
3. The reset button (see image at right) is located beside the cable adapter.
4. While pressing the reset button (minimum of 3 seconds) reinstall batteries. Release reset button.
5. Replace battery cover.

Upon reset, Master Entry Code creation is the only option available and must be performed prior to any other programming of the lock.

Changing Lock: Replacing Cylinder

1. To remove cylinder:
   A. Remove outside escutcheon from door.
   B. Remove rubber gasket.
   C. Remove two screws holding plastic guide in place.
   D. Remove plastic guide.
   E. Remove screw with washer holding cylinder in place (visible after removing plastic guide).
   F. Remove cylinder housing by pulling cylinder tailpiece away from escutcheon.

   Before installing cylinder, be sure tailpiece is correct length (see below).

2. To install new cylinder:
   A. Reverse previous steps for removing cylinder.

* Requires addition of Thin Door Kit.
FCC:

Class B Equipment

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Warning: Changes or modifications to this device, not expressly approved by ASSA ABLOY Residential Group could void the user’s authority to operate the equipment.

Industry Canada:

This Class A digital apparatus meets all requirements of the Canadian Interference Causing Equipment Regulations.

Cet appareillage numérique de la classe A répond à toutes les exigences de l’interférence canadienne causant des règlements d’équipement.
Adding a Yale Z-Wave® Plus Smart Module to your Assure Lock & Z-Wave System

1. Install the Yale Smart Module into the slot above the battery compartment

   **IMPORTANT:** The batteries must be removed before removing the Yale Smart Module:
   - Remove battery cover
   - Remove batteries
   - Insert or remove Yale Smart Module
   - Reinstall batteries
   - Reinstall battery cover

2. Open the Z-Wave system’s smart home or alarm app on your smartphone or tablet

3. Follow the in-app instructions for adding a new device

4. On your lock keypad, enter your master entry code followed by the icon

5. Press the 7 key followed by the icon

6. Press the 1 key followed by the icon

Removing a Yale Z-Wave® Plus Smart Module from your Assure Lock & Z-Wave System

1. On your lock keypad, enter your master entry code followed by the icon

2. Press the 7 key followed by the icon

3. Press the 3 key followed by the icon

4. Open the Z-Wave system’s smart home or alarm app and follow the instructions for removing a device

5. Remove the Yale Smart Module from the slot above the battery compartment

   **IMPORTANT:** The batteries must be removed before removing the Yale Smart Module:
   - Remove battery cover
   - Remove batteries
   - Insert or remove Yale Smart Module
   - Reinstall batteries
   - Reinstall battery cover

6. If you’re adding a new Yale Smart Module, follow the instructions included with it
Warning: Changes or modifications to this device, not expressly approved by ASSA ABLOY Residential Group could void the user’s authority to operate the equipment.

This device is a security enabled Z-Wave Plus product that is able to use encrypted Z-Wave Plus messages to communicate to other security enabled Z-Wave Plus products. This device must be used in conjunction with a Security Enabled Z-Wave Controller in order to fully utilize all implemented functions. This product can be operated in any Z-Wave network with other Z-Wave certified devices from other manufacturers. All non-battery operated nodes within the network will act as repeaters regardless of vendor to increase reliability of the network.

This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and
(2) This device must accept any interference, including interference that may cause undesired operation of the device.

Section 7.1.2 of RSS-GEN Under Industry Canada regulations, this radio transmitter 6982A-YRHCPZW0FM has been approved by Industry Canada to operate with the antenna types listed below with the maximum permissible gain indicated. Antenna types not included in this list, having a gain greater than the maximum gain indicated for that type, are strictly prohibited for use with this device.

Industry Canada:
Contain IC: 6982A-YRHCPZW0FM
Model: YRMZW2-US

Section 7.1.3 of RSS-GEN This Device complies with Industry Canada License-exempt RSS standard(s). Operation is subject to the following two conditions: 1) this device may not cause interference, and 2) this device must accept any interference, including interference that may cause undesired operation of the device.

Le présent émetteur radio 6982A-YRHCPZW0FM a été approuvé par Industrie Canada pour fonctionner avec les types d’antenne énumérés ci-dessous et ayant un gain admissible maximal. Les types d’antenne non inclus dans cette liste, et dont le gain est supérieur au gain maximal indiqué, sont strictement interdits pour l’exploitation de l’émetteur.

Installing the ZigBee® Module

**IMPORTANT:** the batteries must be removed prior to removing and/or inserting the network module:
- Remove battery cover.
- Remove batteries.
- Remove and/or insert network module.
- Reinstall batteries.
- Replace cover.

Enrolling/Unenrolling the Network Module:

This device is a security enabled ZigBee product that is able to use encrypted ZigBee messages to communicate to other security enabled ZigBee products. This device must be used in conjunction with a Security Enabled ZigBee Controller in order to fully utilize all implemented functions. This product can be operated in any ZigBee network with other ZigBee certified devices from other manufacturers. All non-battery operated nodes within the network will act as repeaters regardless of vendor to increase reliability of the network.

To Enroll the Module (Inclusion Mode):
- Enter the 4-8 digit Master PIN code followed by the key.
- Press the key followed by the key.
- Press the key followed by the key.

To Unenroll the Module (Exclusion Mode):
- Enter the 4-8 digit Master PIN code followed by the key.
- Press the key followed by the key.
- Press the key followed by the key.
