This manual will walk you through all the required steps to add your new Yale Assure Lock to your door.

- Remove Existing Door Hardware
- Double Check Door Measurements
- Install your Assure Lock
- Program your Assure Lock
- Add your Assure Lock to your smart home system or August App*

*If purchased with Yale Smart Module or Connected by August Kit

FAILURE TO FOLLOW THESE INSTRUCTIONS COULD RESULT IN DAMAGE TO THE PRODUCT, VOIDING THE FACTORY WARRANTY AND COULD LEAD TO FAILURE OF THE PRODUCT TO PROVIDE ACCESS.
What's In The Box

Loosen screw to remove cover

Inside Lock Assembly
(Separates into 3 components)

4 AA Batteries

Battery Cover

Mounting Plate

Inside Lock

 whispers to

Touchscreen Keypad

Keys

Mounting Hardware
The mounting hardware box includes 12 components

Strike Plate
Adjustable Deadbolt

x2 Inside Lock Screws

x4 Strike Plate and Deadbolt Screws

x2 Optional Security Strike Plate Screws

x2 Long through bolt for 1-3/4" - 2-1/4" Door Thickness

Optional Yale Smart Module

Optional Fire Kit Parts

Installation Guide Envelope
(Includes this manual and door checker with template)
Removing Existing Door Hardware

Do not discard old lock hardware until Assure Lock has been successfully installed.

Frame
2 Check Door Measurements and Make Adjustments If Needed

Door Checker

*Use door checker from installation guide envelope to verify your door measurements and make any needed adjustments.*

New Door Marking Template

*With door checker, use template from installation guide envelope to prep a new door that has not been predrilled for hardware.*

Installing Optional Fire Cup

*optional*

_inside of Door_
Installing Latch & Strike Plate

*Deadbolt latch position is based on backset. Choose position appropriate for your door. Reference Door Checker measurements E and F.

Bolt must be in retracted (unlocked) position.

Choose standard strike plate screws or security screws.
Installing Touchscreen Keypad

Bolt must be in retracted (unlocked) position. Note horizontal orientation of mechanism.
Installing Inside Mounting Plate

*optional*
Attaching the Cable Assembly

Use cable hooks to ensure proper routing.
Do not pinch wire.

Ensure cable is securely fastened into adapter.
7 Installing Inside Lock

Ensure thumbturn is vertical. If the thumbturn does not move freely, refer to the hardware troubleshooting steps.
Testing Mechanical Operation

If thumbturn operation fails, check the installation beginning with Step 7.

Bolt must be in retracted (unlocked) position before installing AA batteries.
Installing Optional Yale Smart Module

Batteries must not be installed prior to inserting and/or removing the Yale Smart module.

For more information about Yale Smart modules and smart home features visit: https://www.yalehome.com/en/yale/yalehome/residential/yale-smart-home-guide/
Installing Batteries and Cover

Bolt must be in retracted (unlocked) position before installing batteries.

Tighten screw to replace cover

Press the Yale logo to wake the lock.
You will be guided to set up your lock by following the audio instructions on the lock.

Additional entry codes and further programming can be done through the Settings Menu. Refer to page 15.

Congratulations, you've installed the Yale® Assure Lock® Touchscreen Deadbolt (YRD226/YRD620)!
Using Your Lock

Touchscreen Keypad

- Press to wake keypad or lock door
- Press to return to previous Settings Menu
- Enter Master Entry Code and press to access Settings Menu
- All Code Lockout Indicator
- Mechanical Key Backup Entry Method

Inside Lock

- Battery Cover
- Inside Notification Light
- Speaker
- Privacy Button
- Thumbturn for manual locking and unlocking
Creating Master Entry Code

The master entry code is used to change the lock settings. A security best practice is to set your master code with 6 or more digits and create a separate code that is used daily to lock and unlock the door.

1. Enter a 4 to 8 digit PIN code followed by the gear key.
2. "Register Master Code. Press the gear key to continue."
3. "Registered."

P/N YRD226-MNL-0001 Rev I
Creating Entry Codes

Master Entry Code must be created first.

*Max user codes = 250 with Smart Module; 25 without.

"Menu Mode, press the gear key to continue."

Adding more *User Codes:

To end programming:
Deleting Entry Codes

Deleting one entry code:
To delete one entry code, you must enter the entry code you wish to delete.

To delete all entry codes
(Does not delete Master Entry Code):

"Menu Mode, enter number, press the gear key to continue."
Unlocking Door with Entry Codes

Enter Entry Code
Press 🔄

*The Master Entry Code must be created prior to any other programming of the lock.
**If Escape Return Mode is enabled, Auto Re-lock cannot be enabled.
## Troubleshooting

<table>
<thead>
<tr>
<th>Symptom</th>
<th>Suggested Action</th>
</tr>
</thead>
</table>
| Lock does not respond – door is open and accessible.                   | • Yale keypad becomes active when the Yale logo is pressed.  
  • Verify contact with the logo.  
  • If keypad numbers are visible, check to see if they respond when pressed.  
  • Check batteries are installed and oriented correctly (polarity) in battery case.  
  • Check batteries are in good condition; replace batteries* if batteries are dead.  
  • Check to see if keypad cable is fully connected and is not pinched.                                                                                                                                 |
| Lock does not respond – door is locked and inaccessible.               | • Batteries may not have enough power. Replace batteries*.  
  • Apply a 9V battery to terminals below the keypad for backup power option.                                                                                                                                 |
| Lock is on for a while then shows no reaction. Lights dim.             | • Batteries do not have enough power. Replace batteries*.                                                                                                                                                             |
| Lock chimes to indicate code acceptance, but door will not open.       | • Check the door gaps for any foreign objects between door and frame.  
  • Check that the cable is firmly connected to the inside lock.                                                                                                                                                      |
| Lock operates to allow access, but will not automatically re-lock.     | • Check to see if Auto Re-lock is enabled.  
  • Disable Auto Re-lock to lock the door (manually).  
  • If low battery indicator is lit, change batteries*.                                                                                                                                                               |
| Entry codes will not register.                                        | • Entry codes must consist of 4 to 8 digits.  
  • The same entry code cannot be used for multiple users.  
  • Management of entry codes is set by the authority of the Master Code, which is set first. Contact the Master user.  
  • Entry codes must be entered within 5 seconds (while keypad is active) or process will have to be restarted.  
  • Check ✓ or gear ⚪ cannot be used as part of the entry code.                                                                                                                                                      |
| Upon entering an entry code and pressing ✓ key, the lock displays "invalid code" error or lock times out without responding. | • Verify entered code is a valid, previously programmed, 4 to 8 digit code.  
  • All Code Lockout Mode is enabled. Only the Master Entry Code can enable/disable All Code Lockout Mode. Contact the Master user.                                                                                  |
| Upon entering an entry code and pressing the ✓ key, red padlock icon appears and there are different tones. | • Check to see if the lock is set to All Code Lockout Mode. Setting/managing All Code Lockout Mode is done through Master Entry Code only. Contact Master user.                                                              |
| Lock operates, but makes no sound.                                     | • Check to see if Volume is set to Silent (see Feature #4).                                                                                                                                                           |
| Lock responds “Low Battery”                                            | • This is the alert to replace the batteries. Replace all four (4) batteries* with new AA Alkaline batteries.                                                                                                          |
| Upon entering an entry code and pressing the ✓ key, lock responds "Wrong number of digits". | • The digits entered were incorrect or incomplete. Re-enter the correct code followed by the check ✓ key.                                                                                                             |
| Lock shows an X on keypad after entering a code.                      | • Bolt failed to fully retract.  
  Refer to the “Hardware Troubleshooting” steps on page 21.  
  • Entry code has not been scheduled for use at time of day it is tried. Try entry code again during its scheduled time.                                                                                                                                 |
| Deadbolt does not extend when locking the door with keypad.           | • Lock was not handed properly. Rehand lock through settings menu.                                                                                                                                                  |

* When batteries are replaced, Smart Module locks have a real time clock that will be set through the User Interface (UI); it is recommended to verify correct date and time particularly those locks operating under Daylight Saving Time (DST).
Hardware Troubleshooting

If deadbolt does not extend or retract easily when testing thumbturn and keypad operation, revisit inside and keypad installation steps. It is important that the bolt be in the retracted position during lock installations and that installation procedure is followed carefully.

Helpful Tip:
Ensuring smooth deadbolt operation can enhance your battery life.

If you feel resistance, ensure deadbolt strike plate aligns with deadbolt. If deadbolt strike plate is out of alignment, please attempt to adjust knob/lever/handleset strike using steps below. The knob/lever/handleset latch engagement into the strike is the main component used for door alignment.

If deadbolt does not fully extend, consider increasing depth of deadbolt strike pocket in frame.

To adjust Knob/Lever/Handleset strike plate:

1. Remove plate from door frame with a manual screwdriver. (Using an electric driver may strip screw heads or enlarge screw holes.)

2. Locate strike plate tab.
   Bend the tab towards surface of strike. Note: a small change may be all that is required

3. Reinstall strike plate using a manual screw driver and test again.

4. If door cannot be adjusted sufficiently with strike tab, both knob/lever/handleset latch and deadbolt latch could require adjustment – we suggest you contact a local locksmith for assistance.

For help with misalignments, watch our door alignment video:
Reseting Lock to Factory Default

When lock is reset to factory defaults all user codes (including the Master Entry code*) are deleted and all programming features are reset to original default settings (see below).

1. Remove the battery cover and batteries.
2. Remove the interior side of the lock to access the reset button.
3. The reset button (see image at right) is located beside the cable adapter.
4. While pressing the reset button (minimum of 3 seconds) reinstall batteries. Release reset button.
5. Replace battery cover.

Upon reset, Master Entry Code creation is the only option available and must be performed prior to any other programming of the lock.

Changing Lock: Replacing Cylinder

1. To Remove cylinder:
   A. Remove outside escutcheon from door.
   B. Remove rubber gasket.
   C. Insert small flathead screwdriver under spring.
      Gently lift spring. **Note:** Notch on top of cylinder engages spring.
   D. Remove cylinder by pulling outward towards outside of door.

**Before installing cylinder, be sure tailpiece is correct length (see below).**

2. To install new cylinder:
   A. Reverse previous steps for removing cylinder.

1-3/8** - 2" thick doors:
   \[ L = 3-1/2" \text{ (88.8mm)} \]
2" - 2-1/4" thick doors:
   \[ L = 3-3/4" \text{ (95.3mm)} \]

*Requires addition of Thin Door Kit.*
FCC:
Class B Equipment
This equipment has been tested and found to comply with the limits for a Class B digital
device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a
residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance
with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur
in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by
turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
• Reorient or relocate the receiving antenna.
• Increase the separation between the equipment and receiver.
• Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
• Consult the dealer or an experienced radio/TV technician for help.

Warning: Changes or modifications to this device, not expressly approved by ASSA ABLOY Residential Group could void the user’s authority
to operate the equipment.

Industry Canada:
This Class A digital apparatus meets all requirements of the Canadian Interference Causing Equipment Regulations.
Cet appareillage numérique de la classe A répond à toutes les exigences de l’interférence canadienne causant des règlements d’équipement.

**Adding a Yale Z-Wave® Plus Smart Module to your Assure Lock & Z-Wave System**

1. Install the Yale Smart Module into the slot above the battery compartment
   
   **IMPORTANT:** The batteries must be removed before removing the Yale Smart Module:
   - Remove battery cover
   - Remove batteries
   - Insert or remove Yale Smart Module
   - Reinstall batteries
   - Reinstall battery cover

2. Open the Z-Wave system’s smart home or alarm app on your smartphone or tablet

3. Follow the in-app instructions for adding a new device

4. On your lock keypad, enter your master entry code followed by the icon

5. Press the 7 key followed by the icon

6. Press the 1 key followed by the icon

**Removing a Yale Z-Wave® Plus Smart Module from your Assure Lock & Z-Wave System**

1. On your lock keypad, enter your master entry code followed by the icon

2. Press the 7 key followed by the icon

3. Press the 3 key followed by the icon

4. Open the Z-Wave system’s smart home or alarm app and follow the instructions for removing a device

5. Remove the Yale Smart Module from the slot above the battery compartment
   
   **IMPORTANT:** The batteries must be removed before removing the Yale Smart Module:
   - Remove battery cover
   - Remove batteries
   - Insert or remove Yale Smart Module
   - Reinstall batteries
   - Reinstall battery cover

6. If you're adding a new Yale Smart Module, follow the instructions included with it

Industry Canada:
Contain IC: 6982A-YRHCPZW0FM
Model: YRMZW2-US

**Section 7.1.2 of RSS-GEN** Under Industry Canada regulations, this radio transmitter may only operate using an antenna of a type and maximum (or lesser) gain approved for the transmitter by Industry Canada. To reduce potential radio interference to other users, the antenna type and its gain should be so chosen that the equivalent isotropically radiated power (e.i.r.p.) is not more than that necessary for successful communication.

En vertu des règlements d’Industrie Canada, cet émetteur radio ne peut fonctionner avec une antenne d’un type et un maximum (ou moins) approuvés pour gagner de l’émetteur par Industrie Canada. Pour réduire le risque d’interférence aux autres utilisateurs, le type d’antenne et son gain doivent être choisies de façon que la puissance isotope rayonnée équivalente (PIRE) ne dépasse pas ce qui est nécessaire pour une communication réussie.

**Section 7.1.3 of RSS-GEN** This Device complies with Industry Canada License-exempt RSS standard(s). Operation is subject to the following two conditions: 1) this device may not cause interference, and 2) this device must accept any interference, including interference that may cause undesired operation of the device.

Cet appareil est conforme avec Industrie Canada RSS standard exemptes de licence(s). Son fonctionnement est soumis aux deux conditions suivantes: 1) ce dispositif ne peut causer des interférences, et 2) cet appareil doit accepter toute interférence, y compris les interférences qui peuvent causer un mauvais fonctionnement du dispositif.

This radio transmitter 6982A-YRHCPZW0FM has been approved by Industry Canada to operate with the antenna types listed below with the maximum permissible gain indicated. Antenna types not included in this list, having a gain greater than the maximum gain indicated for that type, are strictly prohibited for use with this device.

Le présent émetteur radio 6982A-YRHCPZW0FM a été approuvé par Industrie Canada pour fonctionner avec les types d’antenne énumérés ci-dessous et ayant un gain admissible maximal. Les types d’antenne non inclus dans cette liste, et dont le gain est supérieur au gain maximal indiqué, sont strictement interdits pour l’exploitation de l’émetteur.

Installing the ZigBee® Module

IMPORTANT: the batteries must be removed prior to removing and/or inserting the network module:
- Remove battery cover.
- Remove batteries.
- Remove and/or insert network module.
- Reinstall batteries.
- Replace cover.

Enrolling/Unenrolling the Network Module:

This device is a security enabled ZigBee product that is able to use encrypted ZigBee messages to communicate to other security enabled ZigBee products. This device must be used in conjunction with a Security Enabled ZigBee Controller in order to fully utilize all implemented functions. This product can be operated in any ZigBee network with other ZigBee certified devices from other manufacturers. All non-battery operated nodes within the network will act as repeaters regardless of vendor to increase reliability of the network.

To Enroll the Module (Inclusion Mode):
- Enter the 4-8 digit Master PIN code followed by the key.
- Press the key followed by the key.
- Press the key followed by the key.

To Unenroll the Module (Exclusion Mode):
- Enter the 4-8 digit Master PIN code followed by the key.
- Press the key followed by the key.
- Press the key followed by the key.
FCC:
